Available: Saqqarah for PC . XboxThe Beginning is One Thing, but the Last is Another Several days ago I was introduced to a way of the doing that I have never seen before. You may be wondering how I never saw this way before. Well, I have been doing it for years, but this way of doing is so new to me that I had to ask a friend for some pointers. Well after being amazed by her ability to train my way of doing and hearing her comments about getting the kyujo or going the kyujo way, I decided to give it a try. This way is called the kohai aka pectoral stretch. There is a great deal of history that goes with this method of the doing. For myself, I feel that this stretching is very good for aikido, but for our particular style of aikido it has been strengthened by the addition of a certain amount of precision and minimum force.

So if you are going to look at this, do it with attention. Some things to look at before you try this technique. You must look at the posture and the movements of the head and neck. Should the head be forward, should the neck be relaxed? If the head is being pulled back by tension in the neck, you will make the aikido technique clumsy. Look at the arm position, what is the elbow joint position and the upper arm movement. Should the upper arm move with the movement of the elbow, or will the elbow move more independently of the upper arm? If the upper arm moves independently, then the movement of the elbow joint will cause the shoulder joint to be pulled back. Look at the hand
