## TGPSOFT Crack License Key For Windows

TGPSOFT generates thumbnail code for you according to your specifications and your website name. You just select what you want to be included and then adjust the settings for thumbnails and description (description is optional). It will create the HTML code that you insert into the HTML of your web pages. All you have to do is upload it to the various TGP sites. You are able to select from a number of template options for your thumbnails which will change the HTML code. You can also use a custom file name for each thumbnail. TGPSOFT offers the ability to select thumbnails that will appear on the same line of your site, or all at the bottom. You can also select the size of your thumbnails, which is 640x480 for most of the TGPs. However, you can choose to use any size you want. You can also select if you want a description or not for each thumbnail. You can set the description of each thumbnail so that it appears in the description box of your web page. You can even set the location of your thumbnails (at the top or bottom of your website).
