Q: Session has no attribute 'get\_flash' I want to show the flash message. But I've got a error: AttributeError:'module' object has no attribute 'get\_flash' Here is my code:

```
@login_required def create_private_message(request): if request.method == 'POST': if request.POST['send']: user = request.user msg = request.POST['message'] user.get_profile().set_messages(user, msg) user.save() msg_uid = str(uuid.uuid4()) send_message(user, msg_uid, user.id) flash = get_flash(request) redirect(request, 'dashboard') else: return redirect('login') else: return redirect('login') I can't
```

## What's New in the Able Opus Elements?

Download, install, and get rid of the Worm. Every pc has a worm lurking somewhere! This is like the worms in the forest, only much more intelligent. You are suddenly shocked when the worm discovers an internet browser on your system! Now the worm has something to eat and it only needs your PC's internet connection to get there. Every worm has its own method to "hijack" the computer it's discovered on. The Worm uses HTTP to get to the Internet and not SOCKS to keep itself hidden. The software then opens an account at a known site to capture your login info, so it can abuse your account later. Once at the site, the worm will load the "Worm.Win32.gen" file. As the name suggests, this is a piece of software that does a lot of the work of the worm. This new version is able to upload a worm to many sites at once. It then waits a certain amount of time, and then scans for another system to infect. All you need to do is to download and install the Worm and wait until it infects someones system, before you can remove it. After that is done, you will see that there are alot of programs that have infected your pc. Some are serious issues, others just a few programs. Make sure you get rid of all the worms! To help you get rid of the Worm, we have provided a tool to do it. All you need to do is to download and install the Worm and wait until it infects someones system, before you can remove it. After that is done, you will see that there are alot of programs that have infected your pc. Some are serious issues, others just a few programs. Make sure you get rid of all the worms!
